OUR INFRASTRUCTURE

WATER TREATMENT PLANT

EFFLUENT TREATMENT PLANT

SEWAGE TREATMENT PLANT

MULTI EFFECTIVE EVAPORATION SYSTEM

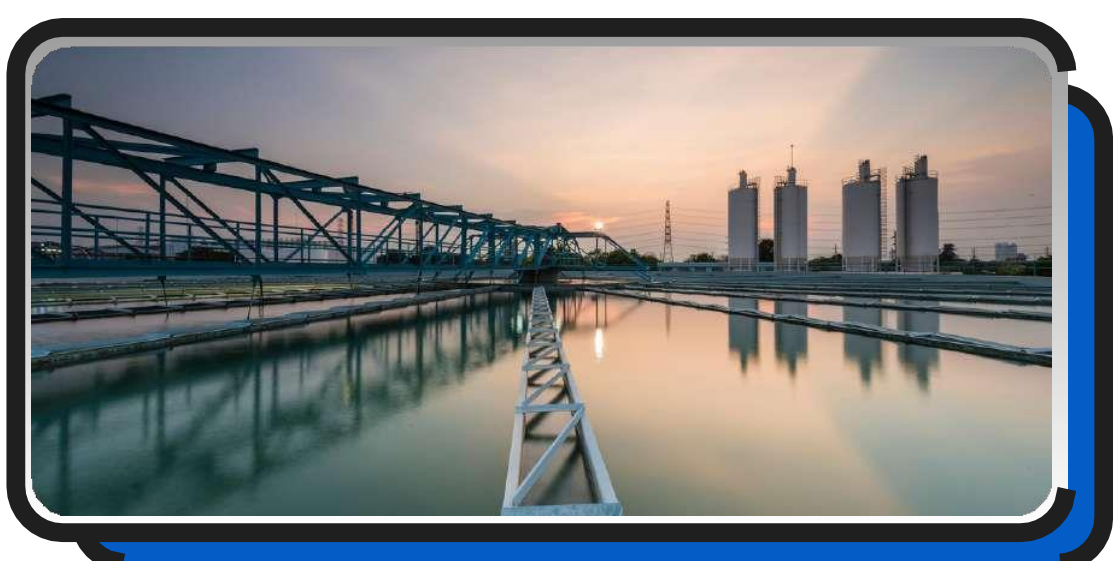

We have a company driven with efficient and reliable infrastructure to meet high standards and are ready for the customized technological waves that come along the way. Having said that we are continuously updating the back end units along with manufacturing from time to time as per the latest technology.

At Abhay Enviro we believe in achieving the best, you need the best and that's why we have advanced infrastructure. We connect infrastructure to anything that directly or indirectly helps to increase productivity and production. With a dedicated area of over 5,000 sq. ft. we have a well-equipped manufacturing unit and astonishing office space.

We are not only fabricators but also have complete knowledge of various processes and process equipment. Our employees are technically proficient in handling raw and finished materials. We believe that happy employees do excellent work.

By connecting our state-of-the-art infrastructure to every aspect of our operations, Abhay Enviro is dedicated to driving productivity and delivering superior results. We believe that with the right resources, we can achieve the best for our clients and the environment.

Over time, we have continuously evolved and upgraded as per the requirements of the market. Today we can proudly deliver our products which are almost in house manufactured and with minimum dependence on outside vendors. We have operated our plant with all necessary and necessary machines.

OUR QUALITY

Abhay Enviro
Engineering
Pvt. Ltd.

UNCOMPROMISED QUALITY, UNMATCHED PERFORMANCE.

At Abhay Enviro Engineering Pvt. Ltd., raw material is procured to meet the technical specifications for our products keeping in mind the usage of the products in client industries. The final finished products are regularly tested and maintained to meet industry standards.

The products are manufactured in compliance with Indian and global quality standards. Our offered products are widely renowned in the market for their features like corrosion resistant, durable, high finish, tempered material, strength and ductility.

Responsible for the environment, high quality operations and that is why high quality, functional design, cleanliness and safety are important values to us. The new range from Abhay Enviro Engineering has set new benchmarks in quality, versatility and performance.

YOUR SATISFACTION, OUR COMMITMENT.

Customer satisfaction is at the heart of everything we do at Abhay Enviro Engineering Pvt. Ltd. We believe that the success of our business is directly tied to the satisfaction of our clients. Our commitment goes beyond delivering high-quality products; we prioritize understanding the unique needs of each customer and providing tailored solutions to meet those requirements.

CUSTOMER SATISFACTION

From initial consultation to after-sales support, we ensure every interaction is marked by professionalism, transparency, and responsiveness. Our team is dedicated to continuously improving our processes, listening to feedback, and adapting to evolving industry demands. By maintaining open lines of communication and delivering on our promises, we aim to build long-lasting relationships and exceed customer expectations at every step.

MAIN PRODUCTS

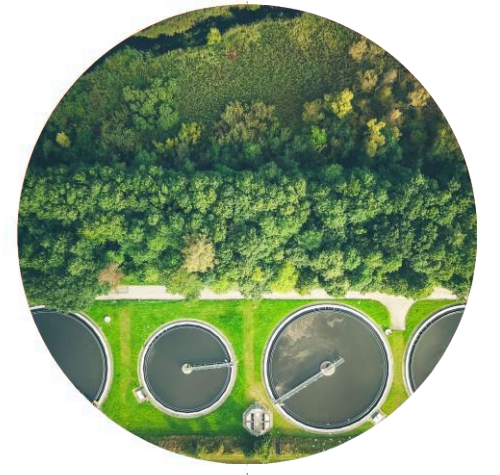

Water Treatment Plant

We design a wide range of high-quality Water Recycling plants based on biological, chemical, physical, and membrane technology/ion exchange processes. Our engineer designs the system by using efficient machinery and high-quality raw materials.

Effluent Treatment Plant

The Effluent Treatment Plant is designed to treat the effluent coming from different areas of the plant. The treatment of different effluents varies with the type of effluent. Water effluent treatment systems are designed to treat effluent...

Sewage Treatment Plant

We have Executed and Commissioned projects in technologies such FAB/ MBBR Systems, Extended Aeration Systems, and Activated Sludge Processes.

Dissolved Air Flotation System

We are suppliers and service providers of the DAF System. Dissolved air flotation is a water treatment process that clarifies wastewater by removal of suspended solids, oils, greases, BOD, COD, and metals. This is achieved by dissolving air in...

Multi Effective Evaporation System

We are suppliers and service providers of Multi Effect Evaporator. A multiple-effect evaporator is an apparatus for efficiently using the heat from steam to evaporate water. Water is boiled in a sequence of vessels, each held at a lower pressure than the last.

DM Plant (Demineralised Plant)

We are suppliers and service providers of DM Plant. Demineralization, also known as deionization, is a process that removes mineral salts from water through the ion exchange procedure. Both cation and anion are removed through this process which is also known as deionization.
